

How to add a Google Map to WordPress

If you have your site hosted on WordPress and need to add a Google Map to show your business' locations, there are a few simple ways to do it.

Use a Store Locator/Wordpress Plugin

- ☐ Select a store locator that's compatible with Wordpress, like Storemapper
- ☐ Create an account and log in
- ☐ Install it on your WordPress page
- ☐ Upload your store's locations
- ☐ Customize your map according to your brand's guidelines
- ☐ Save and publish

Embed your map without a WordPress plugin

- ☐ Go to <https://www.google.com/maps>
- ☐ Log into your Google account
- ☐ Create a map
- ☐ Make your map public
- ☐ Generate an embed code by clicking on "Embed a map"
- ☐ Copy the code
- ☐ Add your Google Map API key (if you have one) to the embed code
- ☐ Log into your Wordpress account

☐ Access the WordPress page editor

☐ Add the embed code to the Text tab
