How to add a Google Map to WordPress

If you have your site hosted on WordPress and need to add a Google Map to show your business' locations, there are a few simple ways to do it.

Use a Store Locator/Wordpress Plugin

Make your map public

Log into your Wordpress account

Copy the code

Generate an embed code by clicking on "Embed a map"

Add your Google Map API key (if you have one) to the embed code

Select a store locator that's compatible with Wordpress, like Storemapper
Create an account and log in
Install it on your WordPress page
Upload your store's locations
Customize your map according to your brand's guidelines
Save and publish
Embed your map without a WordPress plugin
Go to https://www.google.com/maps
Log into your Google account
Create a map

Access the WordPress page editor

Add the embed code to the Text tab

Make and Share Free Checklists
