

Social Media Checklist for Sales Success

Social selling is when sales people use social media to find and engage with new prospects, interact with current customers and listen to the competition. Your prospects, customers and competitors are using social media for business. Whether you're B2B or B2C sales, social media savvy is critical to your sales success.

Your social media profiles are part of your personal brand. Be strategic!

- ☐ **Choose** 1-3 social networks relevant to your target audience.
- ☐ **Profile Photo:** Post a professional profile photo that is recognizable on all your platforms and in real life.
- ☐ **Bio:** Share who you are and your expertise, link to your website, add a CTA.
- ☐ **Links:** Be sure to include links to your website or landing page; many social networks let you add a link in your About or other Bio spot and expand your message.
- ☐ **CTA:** Include a call to action in your bio: Follow Me, Visit My Website, Sign Up for Our Newsletter, Download My eBook, etc
- ☐ **Cover Photos** let you display your personality, share an upcoming event, promote a new product, send a key message or share important news.
- ☐ **Posts** should be in your voice, on topic and relevant: if you're using social media for business, you may want to keep your personal opinions on your personal accounts.
- ☐ **Images** get more views on social media so include photos, graphics, videos, gifs and infographics in your content strategy.
- ☐ **Engage** in existing conversations about your category, interests or brand.
- ☐ **Twitter Lists** help you organize accounts you want to follow into groups so you can easily monitor their posts. **TIP** Users are notified when you add them to a List so be strategic.
- ☐ **Tools** let you plan and schedule your social media posts 1 day, 1 week, 1 month or even 1 year in advance.
- ☐ **Provide value** and be useful - follow the 80/20 rule: 80% useful posts to provide information and resources in your area of expertise, only 20% selling your product or service.

- ☐ **Handle:** Some platforms allow you to have both a name and a handle; ie on Twitter you could have both your name and your brand name.
- ☐ **Pin:** Bios have limited real estate, Twitter and Facebook let you pin a post to the top of your news feed. Pin info you want viewers to know 1st like a sale, special event or key product feature.
- ☐ **Follow** users relevant to your message based on keywords, demographics or hashtags.
- ☐ **Set up** your network notifications based on what actions you want to be notified about, and how frequently.
